

# VIDEO DOWNLOADER DOCUMENTATION

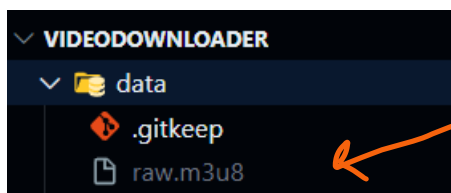

Make sure to download ffmpeg from following link:

<https://www.gyan.dev/ffmpeg/builds/ffmpeg-git-essentials.7z>

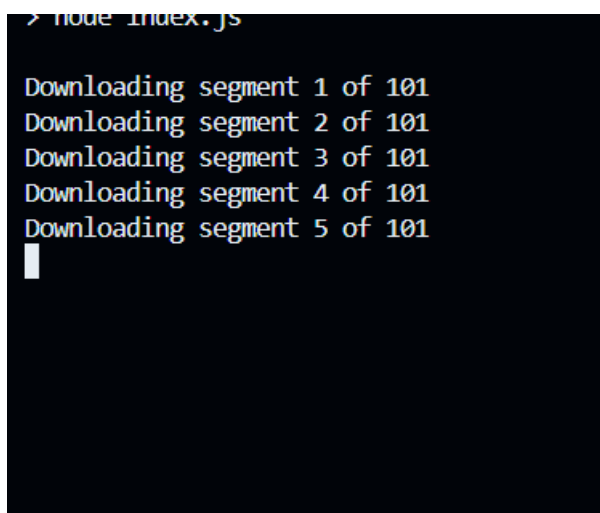

Add system env variable of ffmpeg:

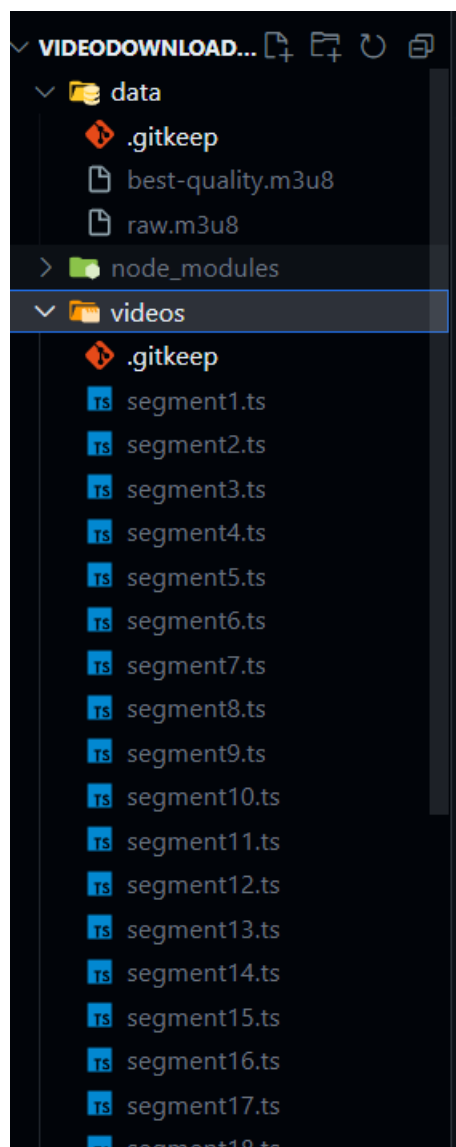

Place raw.m3u8 file in data folder

Run "npm start": it should start downloading segments

Downloaded segments files should appear in video folder

All files should be downloaded automatically and be converted into "Output.mp4" file
